Forecast for Sunday 28 Mar 2021

Weather: A bright, chilly morning with a few well scattered but locally heavy snow showers. Showers will give way to thicker cloud spreading northeast across Ben Alder by late morning and the northern Cairngorms shortly after , bringing sleet or summit snow, this quickly turning to rain at all levels along with extensive hill fog. Rain becoming heavy and persistent in the west of the area especially west of the A9.

Chance of cloud free mountain/hill tops above 800m: 80% decreasing to almost no chace from the south from mid-morning. 10-20% for northern foothills, these seeing the best of the shelter.

Visibility: Morning showers will be well scattered but may reduce visibility to only a kilometre or so and bring patches of cloud down to 400-600m. Otherwise cloud will be well broken and most summits clear until cloud thickens from the south widely to 400-600m. Below this, rain will reduce visibility to several kilometres, perhaps less at times.

Met Office Aberdeen Meteorologist's View
Winds may reach 100mph through evening across the Cairngorm Plateau. Best conditions through morning ahead of cloud and heavy rain.

Forecast for Monday 29 Mar 2021
Weather: Strong southwest winds continue to drag mild and moist air in off the Atlantic leading to some large rainfall totals across the western ranges with ground becoming sodden by the end of the day. Conversely, the northern Cairngorms will see the best of the shelter, perhaps even some bright or sunny spells towards Ben Rinnes.

Maximum wind: Southwest 25-35 gusting 40-50mph but 55-65mph gusting 80mph across the Cairngorm Plateau.

Chance of cloud free mountain/hill tops above 800m: 40% for the northern Caringorms, otherwise very little chance.

Visibility: Cloud will be extensive above 500-700m, often lower across south or southwest facing sloeps, bringing fog conditions widely on the hills. Heavy rain will leave glens rather hazy and reduce visibility to several kilometres below the cloud base in the west, but much improved across the more sheltered north and east.

Temperature: **Glens:** 10-12C.
At 800m: 6-8C.
Freezing level: Well above summits.
